### EDUCATION

Seneca College,  
Database Application Developer  
Sept 2020 – May 2021

Siksha 'O' Anusandhan University,  
Bachelor of Technology in  
Electronics and Communication,  
Aug 2011 – May 2015

### CAREER OBJECTIVE

Positive, driven, and confident individual with an apt for learning new technologies, bringing almost 4 years of database driven web application development experience and strong familiarity with modern technologies like ReactJS along with excellent communication and interpersonal skills.

### SYNOPSIS

#### Web Development Skills

- Almost 4 years of corporate experience developing web applications using ReactJS, ExpressJS, and NodeJS.
- Skilled in developing Single Page Applications (SPAs) that consume data from RESTful web services.
- Proven competency in developing full stack web applications in HTML, CSS, ReactJS, React Hooks, React-Router, Context API in frontend, Express and SpringBoot as Server, and MongoDB, PostgreSQL as Database (GitHub and LinkedIn profile attached).
- Expertise in creating RESTful web services that perform CRUD operations using MongoDB and PostgreSQL and Postman for testing.
- Proficient in developing Web Servers using widely used Open-Source Software such as Node.js and Express.js.
- Exclusively used React-Hooks to handle application workflow along with building custom components using buttons, forms, checkbox, carousel, filters, maps etc.
- Experience in HTML5 and CSS3 for composing and styling of documents for Web.
- Experience with AXIOS, a promise-based HTTP client for the browser, NodeJS as backend for hitting the REST endpoints and fetching data from database.
- Skilled in creating ERD diagrams from business requirement analysis.
- Demonstrated ability to work in large and small teams and taking initiative to provide leadership and guidance within the organization.

### WORK EXPERIENCE

#### Infosys Limited., India

##### Senior Software Developer, May 2015-April 2019

- Almost 4 years of experience building web application solutions for the Infosys Workflow Management System portal.
- Experienced in application development using Agile methodologies in two-week sprints.
- Worked on developing a single page website focused on CRUD operations.
- Collaborated with dedicated backend resource to consume RESTful APIs and integrate with UI business flow.
- Modularised the application as per business requirements and developed the assigned ReactJS Modules under my ownership.
- Demonstrated proficiency in using libraries like ReactJS and state management concepts to build reactive web applications.
- Performed requirement analysis and groomed user stories based on discussion with the product owner and the team.
- Worked with Quality Assurance to identify post-delivery issues and fixed them for high quality UAT delivery.
- Involved with the product owner in UAT and working through any production issues.
- Took initiative to mentor the newcomers to the team.
- Presented and participated in in-house knowledge sharing sessions, training, and seminars focused on upscaling.
